Texas Flood Insurance Claim Help

Tips and info from United Policyholders, a national non-profit that has been helping guide disaster survivors on the road to recovery for over twenty years:

• Take lots of photos and locate a complete, current copy of your insurance policy.

• Focus on drying/cleaning out, avoiding further damage, while getting all flood damage inspected, measured and estimated by qualified, reputable and independent experts.

• Start working on a detailed and itemized “proof of loss” form but don’t rush and leave things out. You have until January 11th, 2016.

• Keep a diary of conversations with insurance, repair, government and other professionals. The person on your claim today may be gone in a week or two.

• If you did not have flood insurance, but wind-driven rain got into your house through the roof or windows, you may have coverage under your home policy.

• If the insurance adjuster says the damage isn’t covered, get an independent opinion before giving up on getting some or all of your claim paid.

• Give your insurance company a chance to do the right thing, but advocate for yourself and be prepared to get help if you’re not being treated fairly. Sources of help include professional claim advocates and attorneys, FEMA, and to a limited extent, the Texas Department of Insurance, (TDI).
